Key Insights Summary

A high-level synthesis of your Dashboard.

The brand published 108 posts: 64 on Facebook and 44 on Twitter. Content drove 18,013 engagements, including 16,026 on Facebook and 1,987 on Twitter.

Posts generated 528,807 impressions, with Facebook contributing 496,127 and Twitter 32,680. The brand ended with 54,659 followers: 50,047 on Facebook and 4,612 on Twitter, with growth rates of 0.15% overall, 0.10% on Facebook, and 0.68% on Twitter.

Total video views reached 258,857, driven by 245,378 Facebook views and 13,479 Twitter views. Facebook outperformed on scale, while Twitter showed stronger follower growth and a higher engagement rate per page at 43.08% versus Facebook's 32.02%.

Observations

As a competitor observation, prioritize Facebook for reach and engagement because 64 posts generated 16,026 engagements and 496,127 impressions, compared with Twitter's 44 posts, 1,987 engagements, and 32,680 impressions.

Replicate the competitor's strongest video approach on Facebook: 1 video generated 245,378 views, representing nearly all 258,857 total video views, while Twitter contributed 13,479.

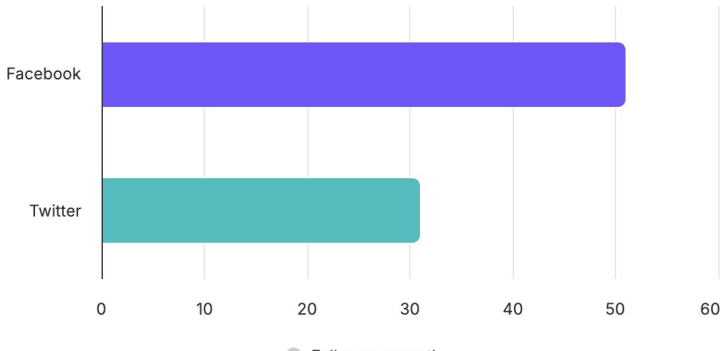

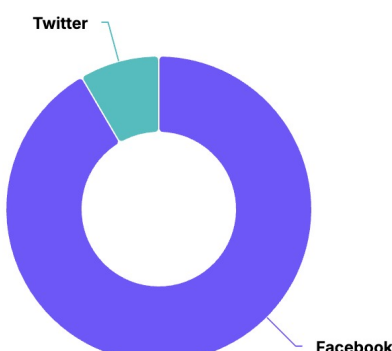

Study the content formats driving Facebook's 250.41 average engagements per post and 5.36% engagement rate by impression, then adapt those formats for higher-impact publishing.
